

Grade boundaries – June 2016 exams

FSMQ Advanced

Here you can see the **unit** grade boundaries for FSMQ Advanced units.

All units comprise two components and the grade boundary marks sometimes need to be scaled before they are aggregated to the overall unit-level. In these instances only the grade A and E scaled boundary marks are shown for each component as only these are set by the awarding committee. These scaled marks are then added to obtain unit-level grade A and E boundaries, at which point the intermediate grade B, C and D boundary marks are calculated for the unit as a whole. In all instances the unit is listed first, followed by its components (shaded and italicised).

Additional information on grade boundaries and uniform marks can be found [here](#).
