MATHEMATICAL STUDIES

Paper 2A – Statistical techniques

Date Morning Time allowed: 1 hour 30 minutes

Materials

For this paper you must have:

- a clean copy of the Preliminary Material (enclosed)
- a scientific calculator or a graphics calculator
- a copy of the formulae sheet and a copy of the statistical tables
- a ruler.

Instructions

- Use black ink or black ball-point pen. Pencil should only be used for drawing.
- Fill in the boxes at the bottom of this page.
- Answer **all** questions.
- You must answer each question in the space provided for that question. If you require extra space, use an AQA supplementary answer book; do **not** use the space provided for a different question. You do not necessarily need to use all the space provided.
- Do not write outside the box around each page.
- Show all necessary working; otherwise marks for method may be lost.
- Do all rough work in this book. Cross through any work that you do not want to be marked.
- The **final** answer to questions should be given to an appropriate degree of accuracy.
- You may **not** refer to the copy of the Preliminary Material that was available prior to this examination. A clean copy is enclosed for your use.

Information

- The marks for questions are shown in brackets. The maximum mark for this paper is 60.
- The paper reference for this paper is 1350/2A.

Please write clearly, in block capitals, to allow character computer recognition.

Pete wants to buy a house.

His annual salary is £66 000

The bank will lend him three times his annual salary for a mortgage.

This is 90% of the house price.

He makes these notes:

$$3 \times 66\,000 = 188\,000$$

$$188\,000 \times 0.9 = 169\,200$$

So I can buy a house up to £169 200

This does not look right. What have I done wrong?

Critically analyse Peter's notes making corrections where necessary.

[3 marks]

7 The scatter diagram opposite gives the length and the wingspan of the twelve most common garden birds in the UK.

7 (a) Calculate the equation of the regression line of l on w and plot the line on the scatter graph opposite.

[5 marks]

Garden birds
Scatter graph of wingspan against length

8 In the UK women's clothing size is usually indicated by numbers.

The British Standards Institute produced a standard set of sizes from 8 to 32

However, stores do not all use the British Standard.

Dresses with the same size number may have different measurements in different stores.

The table below shows some of the actual measurements of size 14 dresses at eight high street stores.

High Street Store	Chest (inches)	Waist (inches)
Italian Connection	37.4	31.1
Matts and Stephens	37.8	31.1
Nix	37.0	30.0
TipShop	38.2	31.2
Denise Poppins	38.2	30.7
Hollis	39.0	31.5
Weiss	39.5	32.1
Elixir	40.2	32.3

8 (a) Describe the correlation between the chest size and waist size of the dresses.

You may use the grid below if you wish.

[3 marks]

- 8 (b) The recommended measurements for a size 14 dress are:

chest	38 inches
waist	31 inches

List the stores in order of how closely they follow these recommendations.

You must show your working to justify your answer.

[3 marks]
