Mathematics

MFP1

Unit Further Pure 1

Friday 14 January 2011 1.30 pm to 3.00 pm

For this paper you must have:

- the blue AQA booklet of formulae and statistical tables.

You may use a graphics calculator.

Time allowed

- 1 hour 30 minutes

Instructions

- Use black ink or black ball-point pen. Pencil should only be used for drawing.
- Fill in the boxes at the top of this page.
- Answer **all** questions.
- Write the question part reference (eg (a), (b)(i) etc) in the left-hand margin.
- You must answer the questions in the spaces provided. Do not write outside the box around each page.
- Show all necessary working; otherwise marks for method may be lost.
- Do all rough work in this book. Cross through any work that you do not want to be marked.

Information

- The marks for questions are shown in brackets.
- The maximum mark for this paper is 75.

Advice

- Unless stated otherwise, you may quote formulae, without proof, from the booklet.

J A N 1 1 M F P 1 0 1

4 Find the general solution of the equation

$$\sin\left(4x - \frac{2\pi}{3}\right) = -\frac{1}{2}$$

giving your answer in terms of π .

(6 marks)

QUESTION
PART
REFERENCE

A large rectangular area containing horizontal dotted lines for writing the answer.

- 6** The diagram shows a circle C and a line L , which is the tangent to C at the point $(1, 1)$. The equations of C and L are

$$x^2 + y^2 = 2 \quad \text{and} \quad x + y = 2$$

respectively.

The circle C is now transformed by a stretch with scale factor 2 parallel to the x -axis. The image of C under this stretch is an ellipse E .

- (a)** On the diagram below, sketch the ellipse E , indicating the coordinates of the points where it intersects the coordinate axes. (4 marks)
- (b)** Find equations of:
- (i)** the ellipse E ; (2 marks)
- (ii)** the tangent to E at the point $(2, 1)$. (2 marks)

QUESTION
PART
REFERENCE

(a)

There are no questions printed on this page

**DO NOT WRITE ON THIS PAGE
ANSWER IN THE SPACES PROVIDED**
