Data Sheet for Sheep Farming

Number of sheep in a field

Use these steps to work out the number of sheep you can safely keep in a rectangular field.

Step 1 Multiply the length of the field in metres by the width of the field in metres.

Step 2 Divide your answer to **Step 1** by 800

Example

A field is a rectangle with length 600 metres and width 400 metres.

Step 1 $600 \times 400 = 240\,000$

Step 2 $240\,000 \div 800 = 300$

You can safely keep 300 sheep in the field.

Sheep shearing

A sheep shearer uses clippers to remove wool from the sheep.

A professional shearer can shear 25 sheep per hour.
