Paper 2   The National Economy in a Global Context

7135/2

Thursday 14 May 2020   Morning

Time allowed: 1 hour 30 minutes

At the top of the page, write your surname and other names, your centre number, your candidate number and add your signature.

[Turn over]

For this paper you must have:
- **the insert**
- **a calculator.**

INSTRUCTIONS

- **Use black ink or black ball-point pen. Pencil should only be used for drawing.**

- **Answer ALL questions in SECTION A.**

- **Answer EITHER Context 1 OR Context 2 in SECTION B.**

- **You will need to refer to the insert provided to answer SECTION B.**

- **You must answer the questions in the spaces provided. Do not write on blank pages.**

- **If you need extra space for your answer(s), use the lined pages at the end of this book. Write the question number against your answer(s).**

- **Do all rough work in this book. Cross through any work you do not want to be marked.**

INFORMATION

- **The maximum mark for this paper is 70.**

- **The marks for questions are shown in brackets.**

- **No deductions will be made for wrong answers.**

**DO NOT TURN OVER UNTIL TOLD TO DO SO**

SECTION A

**Answer ALL questions in this section.**

Only ONE answer per question is allowed.

For each question completely fill in the circle alongside the appropriate answer.

CORRECT METHOD

**WRONG METHODS**

If you want to change your answer you must cross out your original answer as shown.

If you wish to return to an answer previously crossed out, ring the answer you now wish to select as shown.

0 1 An economy experiences a positive supply-side shock. Other things remaining equal, the impact on the economy is most likely to be

○ **A** higher inflation and faster economic growth.

○ **B** higher output and lower inflation.

○ **C** lower employment and slower economic growth.

○ **D** lower unemployment and a larger budget deficit.

[1 mark]

[Turn over]

BLANK PAGE

0 2   The quantity of food imported by an economy increases by 12% in one year. The most likely cause is a fall in

⬜◯   A domestic farm prices.

⬜◯   B income tax.

⬜◯   C the exchange rate.

⬜◯   D welfare benefits.

[1 mark]

[Turn over]

0 3 **FIGURE 1 shows aggregate demand (AD) curves for an economy.**

FIGURE 1

Price
level

Real national output
Which ONE of the following is most likely to cause the aggregate demand curve to shift from AD$_1$ to AD$_2$?

☐ **A A fall in imports**

☐ **B A fall in the price level**

☐ **C A reduction in the budget deficit**

☐ **D A rise in the exchange rate**

[1 mark]

[Turn over]

0 4 Which ONE of the following statements about the consumer price index (CPI) is correct?

○ A A fall in the CPI means that the real value of money is falling

○ B An increase in the CPI means that the rate of inflation is rising

○ C The CPI measures changes in the prices of goods and services bought by households

○ D The weights used in the CPI reflect changes in the quality of goods and services

[1 mark]

0 5 An economy has recently recovered from a recession and closed its negative output gap. The government would now like to increase the trend rate of economic growth.

Which ONE of the following policies is likely to be the most effective?

○ **A Expansionary fiscal policy**

○ **B Expansionary monetary policy**

○ **C Redistributive policies**

○ **D Supply-side policies**

[1 mark]

[Turn over]

0 6   The government invests £1 billion in an extension to the motorway network. As a result, in addition to this initial investment, national income increases by a further £2 billion.

What is the value of the multiplier?

○   A 0.5

○   B 1

○   C 2

○   D 3

[1 mark]

0 7 An economy is experiencing short-run economic growth accompanied by falling unemployment. This is due to rising aggregate demand following the introduction of an expansionary fiscal policy.

Which ONE of the following is most likely to help the economy avoid rising inflation?

○ **A** **A fall in the exchange rate and falling productivity**

○ **B** **A fall in the exchange rate and rising productivity**

○ **C** **A rise in the exchange rate and falling productivity**

○ **D** **A rise in the exchange rate and rising productivity**
[1 mark]

[Turn over]

08 FIGURE 2 shows the aggregate demand (AD) curves and short-run aggregate supply (SRAS) curves for an economy.

FIGURE 2

Which ONE of the following combinations of events is most likely to cause aggregate demand to shift from AD$_1$ to AD$_2$ and short-run aggregate supply from SRAS$_1$ to SRAS$_2$?

A A fall in income tax and lower raw material prices

B A fall in net exports and higher labour productivity

C A rise in money wages and a rise in household saving

D An increase in VAT and a rise in household wealth

[1 mark]

[Turn over]

0 9 A government wishes to reduce the surplus on the current account of the balance of payments. Which ONE of the following sets of policies is likely to be the most successful?

		Change in the exchange rate	Change in the budget surplus
○	A	Decrease	Decrease
○	B	Decrease	Increase
○	C	Increase	Decrease
○	D	Increase	Increase

[1 mark]

1 0 **In which ONE of the following situations is there most likely to be cyclical unemployment in an economy?**

○ **A Absence of an output gap**

○ **B Generous unemployment benefits**

○ **C Many firms with excess capacity**

○ **D Widespread investment in labour-saving equipment**

[1 mark]

[Turn over]

1 1 At the start of the year, the national debt for an economy was £920 billion. In the previous year, the budget deficit was £60 billion. In the current year, government spending is projected to fall by £20 billion and tax revenues to increase by £10 billion from last year's levels.

Other things remaining equal, the expected size of the national debt at the end of the current year is

○ **A** £890 billion.

○ **B** £950 billion.

○ **C** £960 billion.

○ **D** £980 billion.

[1 mark]

1 2 FIGURE 3 shows an economy's aggregate demand (AD) and short-run aggregate supply (SRAS) curves.

FIGURE 3

The initial equilibrium price level is at OP_1. Which ONE of the following is most likely to be responsible for both the cost–push and demand-pull inflationary pressures that raise the price level to OP_2?

○   **A**   A fall in interest rates

○   **B**   A fall in the exchange rate

○   **C**   A rise in direct taxes

○   **D**   A rise in indirect taxes

[1 mark]

[Turn over]

1 3 **Other things remaining the same, the current account deficit of an economy's balance of payments is most likely to**

O **A become smaller as domestic inflation falls below foreign inflation rates.**

O **B deteriorate when there is an upturn in economic activity overseas.**

O **C improve when there is a rise in the exchange rate.**

O **D increase when there is an improvement in the economy's international competitiveness.**

[1 mark]

1 4 **Which statement applies to progressive taxes, but does not apply to proportional or regressive taxes?**

As income falls

○ **A** **a larger percentage of income is taken in tax.**

○ **B** **a smaller percentage of income is taken in tax.**

○ **C** **less income is taken in tax.**

○ **D** **the same percentage of income is taken in tax.**
[1 mark]

O   Y₁   Y₂

Real national output

Which ONE of the following policies is most likely to have caused aggregate demand to shift from AD_1 to AD_2, and long-run aggregate supply to shift from $LRAS_1$ to $LRAS_2$?

○ **A** **A lower rate of corporation tax**

○ **B** **A reduction in the money supply**

○ **C** **An increase in state pensions**

○ **D** **An increase in the exchange rate**

[1 mark]

[Turn over]

1 9 **If the current account of the balance of payments is in surplus, then**

○ **A** the exchange rate of the country's currency must be appreciating.

○ **B** the net value of trade in goods and services plus the net value of primary and secondary income must be positive.

○ **C** the total of all money flows into the economy must be greater than the total of all money flows out.

○ **D** the value of exports of goods and services must be greater than the value of imports of goods and services.

[1 mark]

2 0 The level of unemployment in an economy has fallen. The most likely cause is

○ **A** a reduction in firms' profits.

○ **B** a rise in the retirement age.

○ **C** an increase in immigration.

○ **D** lower mortgage interest rates.
