**F**

**8465/2F**

**Wednesday 20 May 2020 Afternoon**

**Time allowed: 1 hour 45 minutes**

**At the top of the page, write your surname and other names, your centre number, your candidate number and add your signature.**

**[Turn over]**

**For this paper you must have:**

- **a ruler**
- **a protractor**
- **a scientific calculator**
- **the periodic table (enclosed)**
- **the Physics Equations Sheet (enclosed).**

## **INSTRUCTIONS**

- **Use black ink or black ball-point pen. Pencil should only be used for drawing.**
- **Answer ALL questions in the spaces provided. Do not write on blank pages.**
- **If you need extra space for your answer(s), use the lined pages at the end of this book. Write the question number against your answer(s).**

- **Do all rough work in this book. Cross through any work you do not want to be marked.**
- **In all calculations, show clearly how you work out your answer.**

## **INFORMATION**

- **The maximum mark for this paper is 100.**
- **The marks for questions are shown in brackets.**
- **You are expected to use a calculator where appropriate.**
- **You are reminded of the need for good English and clear presentation in your answers.**

**DO NOT TURN OVER UNTIL TOLD TO DO SO**

01

This question is about gases in the atmosphere.

TABLE 1 shows the percentage of gases in Earth's early atmosphere and in Earth's atmosphere today.

TABLE 1

| <b>Gas</b>            | <b>Estimated percentage (%) in Earth's early atmosphere</b> | <b>Percentage (%) in Earth's atmosphere today</b> |
|-----------------------|---|---|
| <b>Carbon dioxide</b> | <b>95.0</b>   | <b>0.04</b>                                       |
| <b>Nitrogen</b>       | <b>3.5</b>  | <b>78.08</b>                                      |
| <b>Oxygen</b>         | <b>0.5</b>  | <b>20.95</b>                                      |
| <b>Other gases</b>    | <b>X</b>  | <b>0.93</b>                                       |

|   |   |   |   |

**A teacher demonstrated waves on a string.**

**FIGURE 12 shows the apparatus used.**

**FIGURE 12**

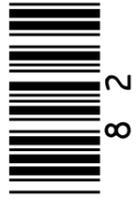

**This is the method used.**

- 1. Switch on the signal generator and vibration generator so the string vibrates up and down.**
- 2. Move the wooden bridge until a clear wave pattern is formed between the wooden bridge and the vibration generator.**
- 3. Use a metre rule to measure the length of the string between the wooden bridge and the vibration generator.**
- 4. Record the frequency of the wave from the signal generator.**
- 5. Record the number of loops in the wave pattern. The wave pattern shown in FIGURE 12 has one loop.**
- 6. Change the frequency on the signal generator until a new wave pattern is formed.**
- 7. Repeat steps 4 to 6.**
