**For this paper you must have:**

- a ruler
- a scientific calculator
- the periodic table (enclosed).

## **INSTRUCTIONS**

- Use black ink or black ball-point pen.
- Pencil should only be used for drawing.
- Answer ALL questions in the spaces provided.
- If you need extra space for your answer(s), use the lined pages at the end of this book. Write the question number against your answer(s).
- Do all rough work in this book. Cross through any work you do not want to be marked.
- In all calculations, show clearly how you work out your answer.

## **INFORMATION**

- **The maximum mark for this paper is 70.**
- **The marks for questions are shown in brackets.**
- **You are expected to use a calculator where appropriate.**
- **You are reminded of the need for good English and clear presentation in your answers.**

**DO NOT TURN OVER UNTIL TOLD TO DO SO**

**0 1**

This question is about the periodic table.

**0 1 . 1**

This question is about energy change.

A student investigated the temperature change when 10 g of ammonium nitrate was added to 100 cm<sup>3</sup> of water.

This is the method used.

1. Measure the temperature of 100 cm<sup>3</sup> of water.
2. Add 10 g of ammonium nitrate.
3. Stir once.
4. Measure the temperature of the solution every minute for 7 minutes.

FIGURE 3 shows the apparatus.
