Other Names _____

Centre Number _____

Candidate Number _____

Candidate Signature _____

I declare this is my own work.

GCSE

BIOLOGY

F

Foundation Tier Paper 1F

8461/1F

Time allowed: 1 hour 45 minutes

At the top of the page, write your surname and other names, your centre number, your candidate number and add your signature.

[Turn over]

J U N 2 2 8 4 6 1 1 F 0 1

For this paper you must have:

- a ruler
- a scientific calculator.

INSTRUCTIONS

- Use black ink or black ball-point pen.
- Pencil should only be used for drawing.
- Answer **ALL** questions in the spaces provided.
- If you need extra space for your answer(s), use the lined pages at the end of this book. Write the question number against your answer(s).
- Do all rough work in this book. Cross through any work you do not want to be marked.
- In all calculations, show clearly how you work out your answer.

INFORMATION

- **The maximum mark for this paper is 100.**
- **The marks for questions are shown in brackets.**
- **You are expected to use a calculator where appropriate.**
- **You are reminded of the need for good English and clear presentation in your answers.**

DO NOT TURN OVER UNTIL TOLD TO DO SO

BLANK PAGE

Answer ALL questions in the spaces provided.

0 1

HIV (Human Immunodeficiency Virus) is a pathogen.

0 1 . 1

How is HIV spread from one person to another person? [1 mark]

Tick (✓) ONE box.

Coughing

Sexual intercourse

Touching door handles

[Turn over]

TABLE 1 shows information about new cases of HIV diagnosed in the UK.

TABLE 1

YEAR	Number of new HIV cases
2010	2642
2014	2767
2018	1530

0 1 . 2

Describe what happened to the number of new cases of HIV from 2010 to 2018.

[2 marks]

[Turn over]

0	1	.	3
---	---	---	---

**What could cause a DECREASE in the number of new HIV cases in the future?
[1 mark]**

Tick (✓) ONE box.

A higher population of people in the UK

A lower number of trained HIV nurses

Better education on how to prevent the spread of HIV

BLANK PAGE

[Turn over]

0	1	.	4
---	---	---	---

Scientists have been working to produce a vaccine for HIV for many years.

How could a vaccine work to prevent a person being infected with HIV?

Write the stages A, B, C, D and E in the correct order. [3 marks]

The first stage has been completed for you.

- A Antibodies attach to the inactive virus.**
- B Antibodies destroy the inactive virus.**
- C An inactive form of the virus is injected into the body.**

- D** If the active virus enters the body, antibodies are produced quickly.
- E** White blood cells produce antibodies to the inactive virus.

C → _____ → _____ → _____ → _____

[Turn over]

0	1	.	5
---	---	---	---

When scientists produce a vaccine for a disease the vaccine is tested on live animals.

What is the next stage in testing the vaccine? [1 mark]

Tick (✓) ONE box.

Testing on cells in a laboratory

Testing on healthy volunteers

Testing on the whole human population

0	1	.	6
---	---	---	---

A vaccine for HIV is important because it is difficult to develop safe drugs to destroy viruses.

Why is it difficult to develop safe drugs to destroy viruses? [1 mark]

Tick (✓) ONE box.

- Drugs that destroy viruses also damage body tissues.**
- There are too many viruses for the drugs to destroy.**
- Viruses are too big for the drugs to destroy.**

[Turn over]

0 1 . 7

Some drugs originated from plants.

Draw ONE line from each drug to the plant the drug originated from. [2 marks]

DRUG

**Plant the drug
originated from**

Aspirin

Foxglove

Rose

Digitalis

Tobacco

Willow

On the opposite page, draw ONE line from each part of the microscope to the function of the part. [3 marks]

**Part of the
microscope**

FUNCTION

A

**To adjust the
focus of the
microscope**

B

**To direct light
into the viewer's
eye**

C

**To hold a slide
in place**

**To magnify the
image of a
specimen**

**To support the
microscope**

[Turn over]

A student prepared some onion cells.

The student viewed the onion cells using a microscope.

This is the method used.

- 1. Cut an onion into pieces using a sharp knife.**
- 2. Peel off a thin layer of cells from one piece.**
- 3. Place the layer of cells onto a microscope slide.**
- 4. Add three drops of iodine solution to the layer of cells.**
- 5. Cover with a cover slip.**
- 6. Place the slide on the stage of the microscope.**

0	4	.	2
---	---	---	---

Why was iodine solution added to the layer of onion cells? [1 mark]

Tick (✓) ONE box.

To dry the cells

To separate the cells

To stain the cells

[Turn over]

0	4	.	3
---	---	---	---

Why was a THIN layer of onion cells used? [1 mark]

Tick (✓) ONE box.

To allow light to pass through the cells

To allow oxygen to pass through the cells

To allow water to pass through the cells

0	4	.	4
---	---	---	---

The student was worried about using a sharp knife to cut the onion.

The student wrote a risk assessment for using a knife.

**Draw ONE line from each part of the risk assessment to the description of the part.
[2 marks]**

**Part of risk
assessment**

DESCRIPTION

Hazard

Call a first aider

**Cut the onion on a
chopping board**

**Plan to
minimise
risk**

**The onion is cut
into pieces**

The knife is sharp

FIGURE 4

0 4 . 5

Line A–B in FIGURE 4 shows the length of cell Z.

Calculate the real length of cell Z.

Complete the following steps. [4 marks]

Measure the length of line A–B in millimetres (mm).

Length of line A–B = _____ mm

Give your measurement of the length of line A–B in micrometres (μm).

1 mm = 1 000 μm

Length of line A–B = _____ μm

[Turn over]

Calculate the real length of cell Z.

Use the equation:

real length of cell Z (in μm) =

$\frac{\text{length of line A-B (in } \mu\text{m})}{\text{magnification}}$

Real length of cell Z = _____ μm

0	4	.	6
---	---	---	---

How would onion cells look different if they were seen using an electron microscope? [2 marks]

Tick (✓) TWO boxes.

The cells would be coloured.

The cells would have no nuclei.

The cells would look larger.

The cells would look more blurred.

The cells would show more internal structures.

[Turn over]

04.7

FIGURE 4 is repeated below.

FIGURE 4

FIGURE 5 shows the student's drawing of FIGURE 4.

FIGURE 5

ONION CELLS

What TWO improvements could the student make to the drawing in FIGURE 5? [2 marks]

Tick (✓) TWO boxes.

Add colour to the cells.

Complete the cell walls.

Draw each cell on a separate piece of paper.

Include the magnification.

Use a ruler to draw the cells.

<hr/>
15

[Turn over]

0	5	.	1
---	---	---	---

Plants take up water from the soil through their roots.

Some of the water is used for photosynthesis.

Complete the word equation for photosynthesis.

Choose answers from the list. [2 marks]

- fat
- glucose
- nitrogen
- oxygen
- protein

carbon dioxide + water \longrightarrow

+

---	---	---	---

Water and dissolved substances are transported through a plant.

Complete the sentences.

Choose answers from the list. [3 marks]

- epidermis
- guard cells
- palisade cells
- phloem
- stomata
- xylem

Water moves from the roots to the leaves in the _____ .

Water is lost from leaves through pores called _____ .

Dissolved sugars are transported in the _____ .

[Turn over]

TABLE 3 shows the rate of transpiration in four different plant species.

TABLE 3

PLANT SPECIES	Rate of transpiration in arbitrary units
A	310
B	254
C	87
D	192

0	5	.	4
---	---	---	---

Which factor could cause species A to have a higher rate of transpiration than species B? [1 mark]

Tick (✓) ONE box.

Each flower of species A has more petals.

Each leaf of species A has more stomata.

Each plant of species A has shorter roots.

0	5	.	5
---	---	---	---

Which environmental change would cause an increase in the rate of transpiration? [1 mark]

Tick (✓) ONE box.

Decreased light intensity

Decreased wind speed

Increased humidity

Increased temperature

[Turn over]

REPEAT OF TABLE 3

PLANT SPECIES	Rate of transpiration in arbitrary units
A	310
B	254
C	87
D	192

TABLE 4 shows information about four jellyfish.

The jellyfish are listed in order of increasing size.

TABLE 4

Jellyfish	Size of jellyfish	Surface area in mm²	Volume in mm³	Surface area to volume ratio
A	Smallest ↓ Largest	3 600	1 200	X:1
B		50 000	25 000	2:1
C		1 800 000	6 000 000	0.3:1
D		7 500 000	125 000 000	0.06:1

0 6 . 1

Calculate value X in TABLE 4. [2 marks]

X = _____

[Turn over]

REPEAT OF TABLE 4

Jellyfish	Size of jellyfish	Surface area in mm ²	Volume in mm ³	Surface area to volume ratio
A	Smallest ↓ Largest	3 600	1 200	X:1
B		50 000	25 000	2:1
C		1 800 000	6 000 000	0.3:1
D		7 500 000	125 000 000	0.06:1

99

0 6 . 2

Describe the relationship between the size of a jellyfish and its surface area to volume ratio.

Use TABLE 4. [1 mark]

The jellyfish in TABLE 4 take oxygen into their cells by diffusion.

0 6 . 3

Name ONE other substance that enters cells by diffusion.

Do NOT refer to oxygen in your answer. [1 mark]

[Turn over]

0	6	.	4
---	---	---	---

Suggest TWO factors that affect the rate of diffusion of oxygen into a jellyfish.
[2 marks]

1

2

0	6	.	5
---	---	---	---

Some organisms take in oxygen using a respiratory system.

In humans, gas exchange takes place in the lungs.

Name the organs where gas exchange takes place in FISH. [1 mark]

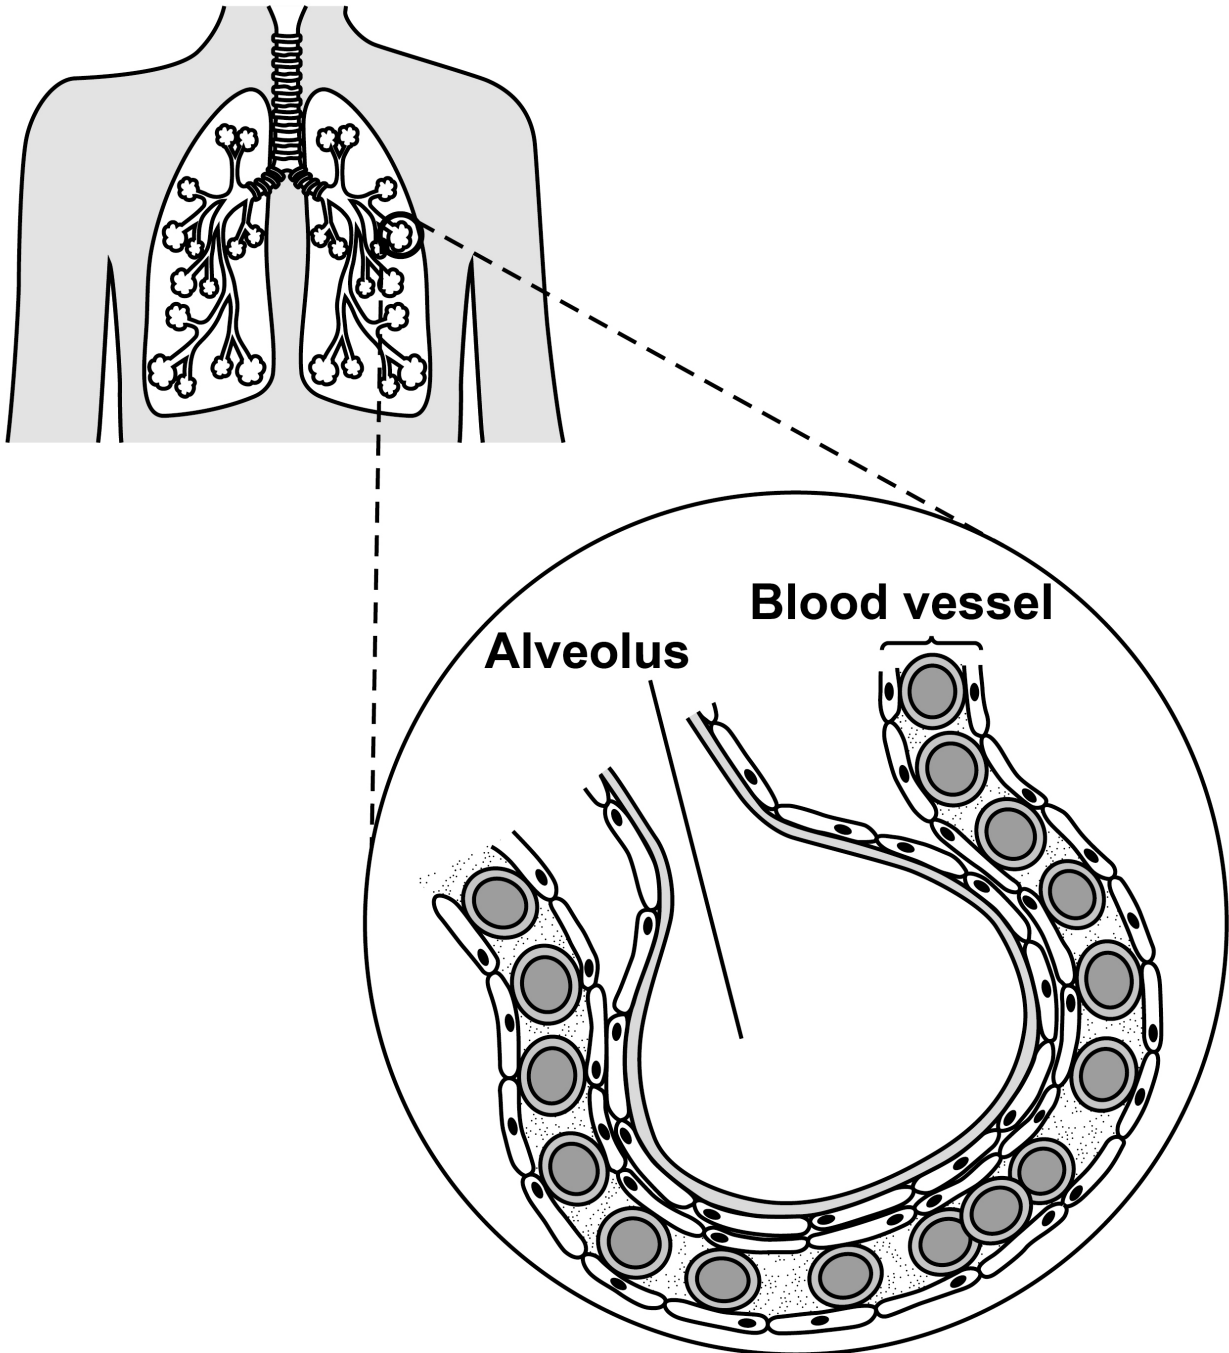

[Turn over]

06.6

FIGURE 8 shows parts of the human breathing system.

FIGURE 8

BLANK PAGE

[Turn over]

07

This question is about cells and transport.

07.1

Complete TABLE 5. [3 marks]

TABLE 5

NAME OF CELL PART	FUNCTION OF CELL PART
	Contains genetic information
Mitochondria	
	Controls the movement of substances into and out of the cell

Cells in potatoes are plant cells.

Cells in potatoes do NOT contain chloroplasts.

0 7 . 2

**What is the function of chloroplasts?
[1 mark]**

0 7 . 3

**Name ONE type of cell in a potato plant that does NOT contain chloroplasts.
[1 mark]**

[Turn over]

A student investigated the effect of salt concentration on pieces of potato.

This is the method used.

- 1. Cut three pieces of potato of the same size.**
- 2. Record the mass of each potato piece.**
- 3. Add 150 cm^3 of 0.4 mol/dm^3 salt solution to a beaker.**
- 4. Place each potato piece into the beaker.**
- 5. After 30 minutes, remove each potato piece and dry the surface with a paper towel.**
- 6. Record the mass of each potato piece.**
- 7. Repeat steps 1 to 6 using different concentrations of salt solution.**

0	7	.	4
---	---	---	---

What is the independent variable in the investigation? [1 mark]

Tick (✓) ONE box.

- Concentration of salt solution**
- Mass of potato piece**
- Time potato is left in salt solution**
- Volume of salt solution**

[Turn over]

0	7	.	5
---	---	---	---

Why did the student dry the surface of each potato piece with a paper towel in step 5? [1 mark]

The student calculated the percentage change in mass of each potato piece.

0	7	.	6
---	---	---	---

For one potato piece:

- **the starting mass was 2.5 g**
- **the end mass was 2.7 g.**

Calculate the percentage increase in mass of the potato piece. [2 marks]

Use the equation:

percentage increase in mass =

$$\frac{\text{increase in mass}}{\text{starting mass}} \times 100$$

Percentage increase in mass =

_____ %

[Turn over]

The student used the results from each potato piece to calculate the mean percentage change in mass at each concentration.

TABLE 6 shows the results.

TABLE 6

Concentration of salt solution in mol/dm³	Mean percentage (%) change in mass
0.0	9.8
0.1	9.5
0.2	7.0
0.3	0.4
0.4	-1.4

BLANK PAGE

[Turn over]

0	7	.	7
---	---	---	---

Complete FIGURE 9, on the opposite page.

You should:

- **label the x-axis**
- **use a suitable scale for the x-axis**
- **plot the data from TABLE 6, on page 80**
- **draw a line of best fit.**

[4 marks]

0	7	.	8
---	---	---	---

What concentration of salt solution was equal to the concentration of the solution inside the potato pieces?

Use FIGURE 9. [1 mark]

Concentration = _____ mol/dm³

FIGURE 9

**Mean percentage (%)
change in mass**

[Turn over]

BLANK PAGE

08

Plant cells and fungal cells are similar in structure.

FIGURE 10 shows a fungal cell.

FIGURE 10

0	8	.	1
---	---	---	---

Name **ONE** structure in **FIGURE 10** which is present in both plant cells and fungal cells but **NOT** in animal cells. [1 mark]

0	8	.	2
---	---	---	---

Which disease is caused by a fungus?
[1 mark]

Tick (✓) **ONE** box.

Gonorrhoea

Malaria

Measles

Rose black spot

[Turn over]

0	8	.	3
---	---	---	---

A fungal cell divides once every 90 minutes.

How many times would this fungal cell divide in 24 hours? [2 marks]

Number of times cell divides in

24 hours = _____

Some types of fungal cell are grown to produce high-protein food.

The high-protein food can be used to make meat-free burgers.

0 8 . 4

Where is protein digested in the human digestive system? [1 mark]

Tick (✓) ONE box.

Large intestine

Liver

Salivary glands

Stomach

[Turn over]

0	8	.	5
---	---	---	---

Which chemical could be used to test if the burgers contain protein? [1 mark]

Tick (✓) ONE box.

Benedict's reagent

Biuret reagent

Ethanol

Iodine solution
