Paper 2 Calculator

Time allowed: 1 hour 30 minutes

Materials

For this paper you must have:

- a calculator
- mathematical instruments.

Instructions

- Use black ink or black ball-point pen. Draw diagrams in pencil.
- Answer **all** questions.
- You must answer the questions in the spaces provided. Do not write outside the box around each page or on blank pages.
- If you need extra space for your answer(s), use the lined pages at the end of this book. Write the question number against your answer(s).
- Do all rough work in this book. Cross through any work you do not want to be marked.
- State the units of your answer where appropriate.

Information

- The marks for questions are shown in brackets.
- The maximum mark for this paper is 60.
- You may ask for more answer paper, graph paper and tracing paper. These must be tagged securely to this answer book.

Advice

In all calculations, show clearly how you work out your answer.

6 Increase 78 by 35%

[3 marks]

Answer _____

7 Work out the volume of this cuboid.
State the units of your answer.

[3 marks]

Answer _____

Answer **all** questions in the spaces provided.

Mr Nagah and Miss Burns are geography teachers.
They are planning a trip for 34 students to a field centre.

[3 marks]

[illegible]

Answer _____

- 8 (b)** Mr Nagah is working out the time they should leave school for the field centre.
He makes these notes.

It will take one and a half hours to get to the field centre

The students will need 20 minutes to unpack

We will then have 45 minutes for lunch

We must be ready for our first activity at 1 pm

Work out the latest time they can set off.

[4 marks]

Answer _____

- 8 (c)** The total cost of the trip is £3265
The geography department pays 20% of this cost.
The rest of the cost is shared equally by the 34 students.
Work out how much each student has to pay.
Give your answer to the nearest pound.

[5 marks]

Answer £ _____

Garden Birds

Simon has a bird feeder in his garden.

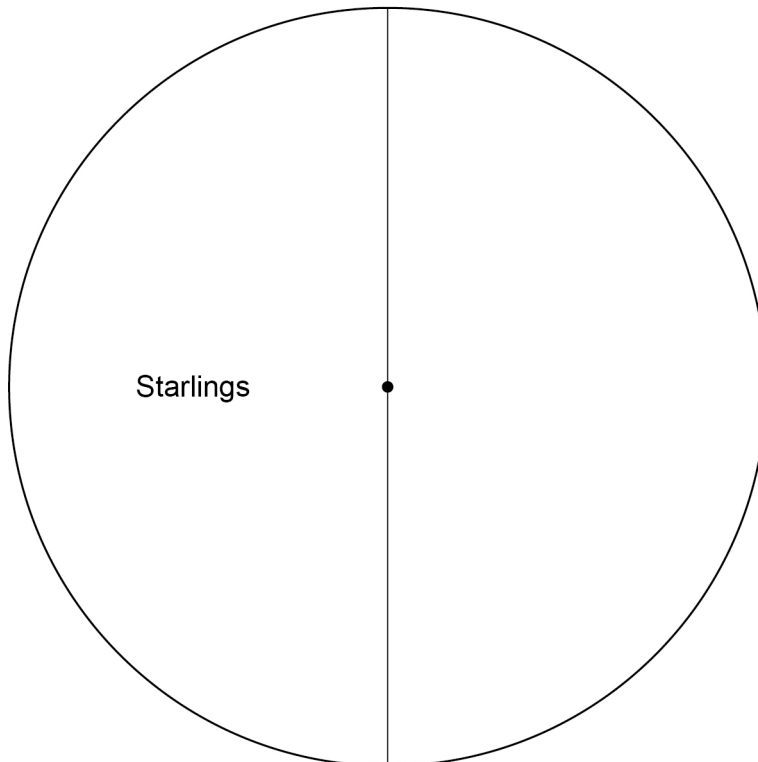

- 9 (a) On Monday Simon records the types of birds that visit his bird feeder. He uses this table to work out the angles needed for a pie chart.

	Number	Angle (degrees)
Starlings	18	
Sparrows	9	
Blackbirds	6	
Others	3	
	Total = 36	

Complete the pie chart.

[4 marks]

- 9 (b)** Simon takes a photo of each of the 36 birds that visit the bird feeder on Monday.
He decides to choose one of the photos at random.

Simon says,

“The probability that the photo is of a sparrow is **more than** $\frac{1}{3}$ ”

Is Simon correct?

You **must** show your working.

[2 marks]

Question 9 continues on the next page

Turn over ►

9 (c)

Day	Mon	Tues	Wed	Thurs	Fri	Sat	Sun
Number of birds	36	25	30	42	44	26	56

In the same week last year, the mean number of birds per day was 39

This year, has the mean increased, decreased or stayed the same?

Tick (✓) **one** box.

7

stayed the same

Show working to support your answer.

[4 marks]

[illegible]

He says,

Is Simon correct?

[4 marks]

This image shows a blank sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

10 Photographer

Liam is a photographer.

- 10 (a)** Liam is asked to take photos at Molly's party.
He uses this formula to work out his fee.

$$\text{Fee} = £40 + \text{number of photos} \times £3.75$$

Molly wants 18 photos.

She gives Liam six £20 notes.

How much change should she get?

[4 marks]

Answer £ _____

Liam kept a tally of the packs he sold one day.

Pack	Tally	Frequency
A		
B		
C		
D		

You **must** show your working.

[3 marks]

[illegible]

10 (c)

Liam wants to arrange six photos on a display board in his studio.

The board is a rectangle with width 120 cm and height 140 cm

He has

- one photo of width 60 cm and height 60 cm
- two photos each of width 30 cm and height 40 cm
- three photos each of width 25 cm and height 15 cm

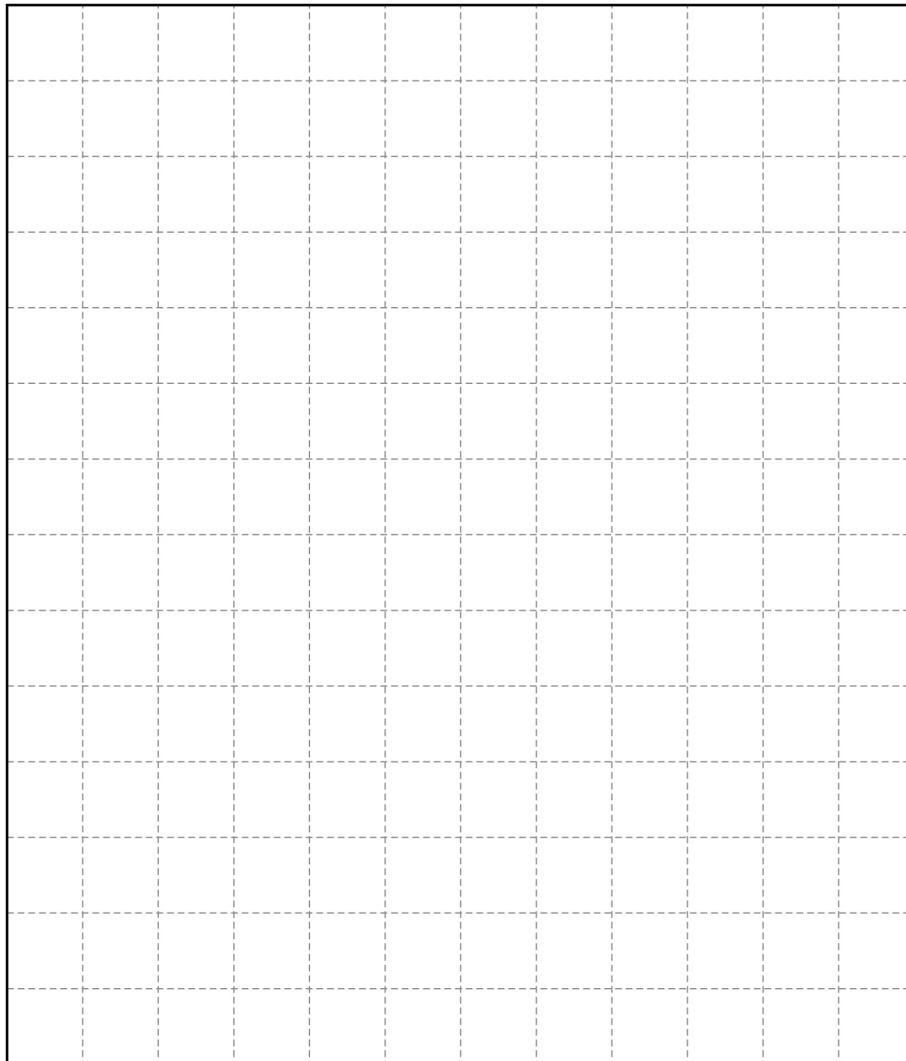

There must be a space of at least 10 cm between photos.

The grid is a scale drawing of the display board.

Use the grid to show how Liam could arrange the photos.

[5 marks]**Scale:**

represents a 10 cm by 10 cm square

11 Patchwork

Daisy is making a cushion.

The front of the cushion has a patchwork design made up of 16 square patches.

The back of the cushion is a single piece of fabric.

11 (a) Daisy starts to make a sketch of her design.

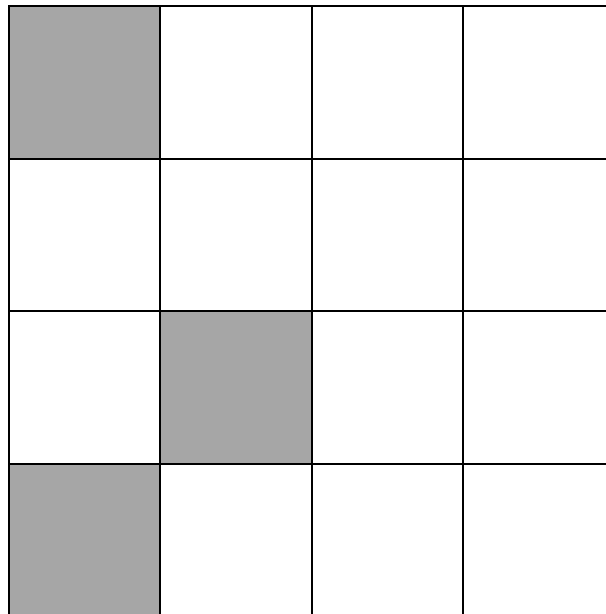

6 of the squares will be grey.

The rest of the squares will be white.

She has shaded 3 of the 6 grey squares.

Shade **3 more** squares so that the design has **at least** one line of symmetry.

[2 marks]

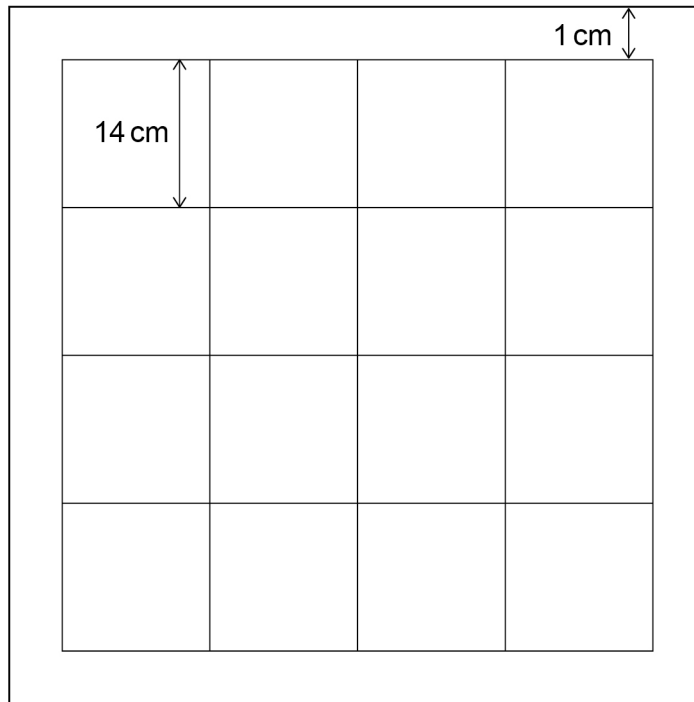

Question 11 continues on the next page

Turn over ►

- 11 (b)** Each of Daisy's square patches measures 14 cm by 14 cm
There is a 1 cm border around the patchwork.
The diagram shows the front of Daisy's cushion.

Not drawn
accurately

The front and back of the cushion are the same size.

Daisy has a **square** piece of fabric with an area of 3600 cm^2

She wants to cut the back for her cushion from this piece of fabric.

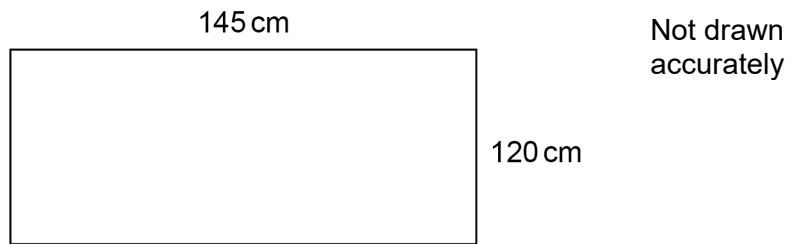

Is this piece of fabric big enough?

You **must** show your working.

[4 marks]

- 11 (c)** Daisy also sews a patchwork quilt.
The quilt is a rectangle.

Daisy wants to put cord around the outside edges of the quilt.
She has 3.6 **metres** of cord.

How much **more** cord does Daisy need?
State the units of your answer.

[4 marks]

Answer _____
