Read ITEM A below and answer the question that follows.

ITEM A

There is a gap in educational achievement between girls and boys. This gap is present in primary school and carries on through to university. Some sociologists see factors outside of school as the main cause of gender differences in educational achievement. One factor is the change in the roles of men and women in society. Girls now have a wider range of female role models in society to aspire to than before.

Other sociologists suggest that factors inside the school, such as the presence of laddish anti-school subcultures, may have a greater effect on gender differences in educational achievement.

Applying material from ITEM A and your knowledge, evaluate the impact of external factors on gender differences in educational achievement. [20 marks]

Read ITEM B below and answer the question that follows.

ITEM B

Investigating pupils' experiences of bullying in schools

Bullying is a sensitive problem for schools. Schools have procedures and policies in place to deal with bullying. If a school is perceived to have high levels of bullying, it could prove damaging to their reputation within the community. Bullying can take a number of different forms. When researching bullying, sociologists often look at pupil peer groups in school and at power differences between pupil groups.

Sociologists may use unstructured interviews to study bullying. Using unstructured interviews enables the researcher to build up a level of trust between themselves and the interviewee and as a result gain richer and more detailed responses. However, such interviews are often time consuming and can generate large amounts of data to analyse.

Applying material from ITEM B and your knowledge of research methods, evaluate the strengths and limitations of using unstructured interviews to investigate pupils' experiences of bullying in schools. [20 marks]
