Higher Tier Paper 4 Physical Sciences

**8465/4H**

Tuesday 13 June 2023 Morning

Time allowed: 1 hour 45 minutes

At the top of the page, write your surname and forename(s), your centre number, your candidate number and add your signature.

[Turn over]

## **MATERIALS**

**For this paper you must have:**

- a ruler
- a protractor
- a scientific calculator
- the periodic table (enclosed)
- the Physics Equations Sheet (enclosed).

## **INSTRUCTIONS**

- Use black ink or black ball-point pen. Pencil should only be used for drawing.
- Answer ALL questions in the spaces provided. Do not write on blank pages.
- If you need extra space for your answer(s), use the lined pages at the end of this book. Write the question number against your answer(s).
- Do all rough work in this book. Cross through any work you do not want to be marked.
- In all calculations, show clearly how you work out your answer.

## **INFORMATION**

- **The maximum mark for this paper is 100.**
- **The marks for questions are shown in brackets.**
- **You are expected to use a calculator where appropriate.**
- **You are reminded of the need for good English and clear presentation in your answers.**

**DO NOT TURN OVER UNTIL TOLD TO DO SO**

**[Turn over]**

The combustion of hydrocarbon fuels releases energy.

A student investigated the energy released by three different fuels A, B and C.

FIGURE 1 shows the apparatus.

FIGURE 1

This is part of the method used.

1. Put fuel A in the burner.
2. Pour  $100 \text{ cm}^3$  of water into the conical flask.
3. Record the temperature of the water.
4. Light the fuel and heat the water for 5 minutes.
5. Record the final temperature of the water.
6. Repeat steps 1 to 5 using fuel B and then using fuel C.

0	1	.	3
---	---	---	---

The student also determined the mass of fuel burnt.

Describe how the student could determine the mass of fuel burnt. [2 marks]

---

---

---

---

---

---

---

---

0	1	.	4
---	---	---	---

Give ONE control variable in the investigation. [1 mark]
